Christopher Corey
Search Group of San Diego 858-217-5582 chris@sgsd.jobs --

We are currently seeking a highly motivated and innovative scientist to join our Immunology group. The individual, utilizing Five Prime's unique discovery system, will lead a project to screen proteins in in-vivo models of inflammation and autoimmunity in order to identify therapeutics for autoimmune diseases.

The candidate will also participate in the design and implementation of in vitro cell based assays, as well as studies aimed at validating and determining mechanism of action of therapeutic candidates.

Requirements

Education and Experience:

Applicants must have a Ph.D. in immunology or related field with at least 4-8 years of experience, including post-doctoral experience. The ideal candidate will be an outstanding scientist with experience in multiple models of autoimmunity. Industry experience in biopharmaceutical drug discovery is highly desirable.

Skills:

Expertise in immunology and autoimmunity is required. Experience with in vivo models of autoimmunity and/or inflammation is required.

Expertise in developing cell-based assays using a variety of cell types and a variety of assay readouts is a plus.

Expertise in flow cytometry is highly preferred. Experience utilizing a BD LSRII is a plus. Industry experience translating assays into high throughput screens is highly desirable.

The ability to work as part of a cross-functional team and outstanding communication and presentation skills are required.
