**Postdoctoral Position at the University of Texas at Dallas**

Applications are invited for an NIH funded Postdoctoral position in the University of Texas at Dallas within the research group of Prof. Leonidas Bleris. The project will be co-supervised by the Bleris Lab and the Ward/Ober Lab from the University of Texas, Southwestern Medical School.

The successful candidate will work towards modeling the behavior of engineered antibodies and subcellular trafficking in vivo. These models will be developed and extensively validated against experimental data that will be generated in the Ward/Ober Lab. The study aims to reveal important insights into the design of potential new therapeutic agents for the treatment of autoimmune diseases.

Candidates should have a Ph.D. with expertise in mathematical modeling.

The position is available immediately and all applications (including CV and references) should be sent to Prof. Bleris ([bleris@utdallas.edu](mailto:bleris@utdallas.edu)).
