

Medical Affairs Specialist - BOTOX Neuroscience(Job Number: 100777)

Allergan is a Fortune 500, global, technology-driven multi-specialty health care company pursuing therapeutic advances to help patients live life to their fullest potential. In making this commitment, we work to develop an unparalleled level of insight into patients' wants and needs - and into the priorities and concerns of the medical specialists who treat them. To this end, we employ more than 50 percent of our work force in either research and development (R&D) or sales, ensuring our efforts are focused on innovation and our customers.

Description

Under the supervision of the specified Therapeutic Area, Global Medical Affairs, the Specialist is responsible for strategic Phase IV initiatives and supporting the development of Allergan's clinical advocate base within the therapeutic area. Position is based in Irvine (Global Medical Affairs). Maintains current scientific knowledge of the therapeutic area and related sciences. Interacts with Legal, Regulatory, Marketing, Sales, and Clinical R&D. Seeks out information from medical and scientific literature, scientific meetings, symposia, and seminars that differentiates Allergan products from the competition. Actively involved in the execution, analysis, and publication of Allergan Phase 3B/4 clinical trials. Assists with management and execution of a tactical publication plan for congresses and journals. Supports opinion leaders on Phase IV studies and publication deliverables for in-line and close to market products. Analyzes program productivity by tracking performance vs quarterly forecasts, and vs previous year. Shared departmental management functions: budget, meetings, and training.

The employee must conduct their work activities in compliance with all Allergan internal requirements and with all applicable regulatory requirements. Allergan internal requirements include compliance with ethics, environmental health and safety, financial, human resources, and general business policies, requirements and objectives.

Qualifications
