

**Postdoctoral position in the Department of Biological Chemistry,
School of Medicine, University of Athens**

Position

The Department of Biological Chemistry, at the University of Athens Medical School, is seeking a qualified researcher from abroad.

Principal areas of research interest include: high-throughput proteomics for cell signaling, transcription factors and biochemistry of signaling pathways in carcinogenesis.

Requirements

- PhD with substantial experience in molecular and cell biology
- Demonstrate technical independence with cell culturing, transfections and standard molecular and cell biology techniques
- Meticulous at planning, executing and organizing experiments
- Capable of taking initiative, work independently and in a collaborative setting
- Good publication record in recognized peer-reviewed journals

Compensation

Salary according to current scale plus benefits

Deadline

Applicants should send an updated CV including publication list and academic reference letters until the first week of December to:

Assistant Professor Michalis V. Karamouzis MD, PhD, mkaramouz@med.uoa.gr
