

## **Pennsylvania State University College of Medicine**

Dept of Pediatrics, H085  
500 University Drive P.O. Box 850  
Hershey, PA 17033-0850

### **Physician-Scientist/Basic Scientist position in Host defense, Inflammation & Lung Disease**

The Department of Pediatrics at The Penn State Hershey College of Medicine and Penn State Hershey Children's Hospital has recently formed the Penn State Hershey Center for Host Defense, Inflammation, and Lung Disease (CHILD) Research. The goal of this Center is to bridge the broad expanse that presently exists between basic science discoveries and the implementation of these advances into clinical practice. The Department of Pediatrics at Penn State Hershey Children's Hospital is committed to the success of this Center.

This Center is presently recruiting scientists or physician-scientists to expand on the research mission of the department. The position is open-rank, and all pediatric subspecialists, particularly individuals with research interests in basic science, translational/clinical research, alternative medicine research, and innovative approaches within the scope of the Penn State Hershey CHILD Research, are encouraged to apply.

Beautiful surroundings, affordable housing and excellent schools provide a superior environment for life outside the workplace. Penn State is committed to affirmative action, equal opportunity and the diversity of its workforce. EOE-AA-M/F/D/V

More information on the Center is available at <http://www.hmc.psu.edu/childrens/research>. Interested applicants should contact Dr. Joanna Floros at 717-531-6972 or [jfloros@psu.edu](mailto:jfloros@psu.edu).
