

National Cancer Institute, NIH

Postdoctoral research position

A postdoctoral research position is available in the Inflammation Biology Unit, Experimental Immunology Branch, NCI, NIH. A major interest of the laboratory is studying the **mechanisms of leukocyte-endothelial interactions** in the context of **inflammation** and **autoimmunity**, as well as the crosstalk of inflammation and angiogenesis. The studies include analysis of mice.

A good background in immunology as well as experience in cellular/molecular biology and in working with mice is required.

Interested applicants should email a **detailed CV, bibliography, cover letter** and the **name of three references** to Dr. T. Chavakis, EIB, NCI, NIH, 10 Center Drive, Rm. 5B17, Bethesda, MD 20892. chavakist@mail.nih.gov

NIH is an Equal Opportunity Employer.
