

National Technical University of Athens

Department of Mechanical Engineering

Three positions are available at the National Technical University of Athens in the area of **Systems Biology and Bioengineering**. We are looking for talented scientists (**biologists, engineers, and computer scientists**) to join a newly established multidisciplinary lab.

Engineers and computer scientists will be responsible for the development of **computational models relevant to signaling processing, optimization algorithms, and biomechanical testing**.

Biologists will work with **mammalian cells** and **high throughput protein measurements** for **drug development** and **lead discovery/optimization**.

Positions can be at the level of **graduate student, postdoc, or tech**.
