

## **Northwestern University Feinberg School of Medicine**

A Postdoctoral position for an energetic and highly motivated Ph.D. or MD/Ph.D. with experience in cell and molecular biology is available in the Department of Dermatology at Northwestern University, Chicago Campus. The overall area of investigation focuses on a new collaborative research endeavor between two established laboratories aimed at understanding epithelial regeneration using the corneal epithelium as a model system. Specifically, the research will involve the elucidation of the role(s) that the Eph-R/ephrin signaling complexes play in maintaining and regulating epithelial stem cells. Trainees will be provided an environment, along with opportunities and guidance to develop an independent research program. Send a curriculum vitae and contact information for three references to both: Robert M. Lavker, Ph.D., and Spiro Getsios, Ph.D. Department of Dermatology, Northwestern University, 303 E. Chicago Ave., Chicago, IL 60611. E-mail: r-lavker@northwestern.edu
