

## Post doc/phD advertisement

2 Post doc and 1 phD position are available in the lab of **Evi Soutoglou** at IGBMC in Strasbourg ([http://www.igbmc.fr/index\\_uk.html](http://www.igbmc.fr/index_uk.html)) starting in January 2009. We use a combination of biochemical and advanced live cell imaging techniques to investigate the fundamental role of chromatin and nuclear architecture in DNA repair and the formation of cancer translocations.

The group is funded by IGBMC and CNRS.

Applicants should have a PhD or at least 4 years of graduate research experience. Experience in cell biology, live imaging techniques and/or image processing is not absolutely required but it will be an advantage.

Interested candidates should contact Evi Soutoglou via email [soutogle@mail.nih.gov](mailto:soutogle@mail.nih.gov) with a detailed CV, and 2-3 names and contact information of people that will provide letters of recommendation.
